SAFE HARBOUR

THE ACEToken CONCEPT

To create a system that allows buyers a secure mechanism to procure and provide Personal Protective Equipment (PPE); deliver the products; and return profits to the token holders.

Additionally, the same system will be able to fund not only PPE procurement securely, but also expand into funding green energy projects in manufacturing, warehousing, housing, and transportation.

To help like-minded individuals net the highest returns with the lowest risk, with minimum effort.

Harness the unique capabilities inherent to cryptocurrency and deliver numerous financial and security benefits with low friction and easy access.

Ace Holdings Global Inc. and the ACEToken will deliver the functionality of services combined with solutions to a number of pressing issues into a single turnkey operation that offers multiple benefits to users; while avoiding the need to be involved with and or monitor multiple products and processes to meet the same end needs.

The combination of the supply chain with the integration of the manufacturers and the benefits of cryptocurrency investing is within everyone's reach.

INTRODUCTION

ACEToken is a 100% decentralized BEP-20 community based unique crypto currency initiative designed to give real value and enhance value creation to its participants.

Our initial initiatives are in the PPE and Green Energy Sectors. It is our intention to use the funds raised from token sales to secure production contracts and stake holds in viable green energy projects.

ACEToken is based on real world commercial transaction economics where we invest 50% of profits and dividends into our liquidity pool, thereby enhancing the value of the ACEToken.

The traditional model seen in other crypto currencies rely primarily on market movements based on supply and demand to drive price changes.

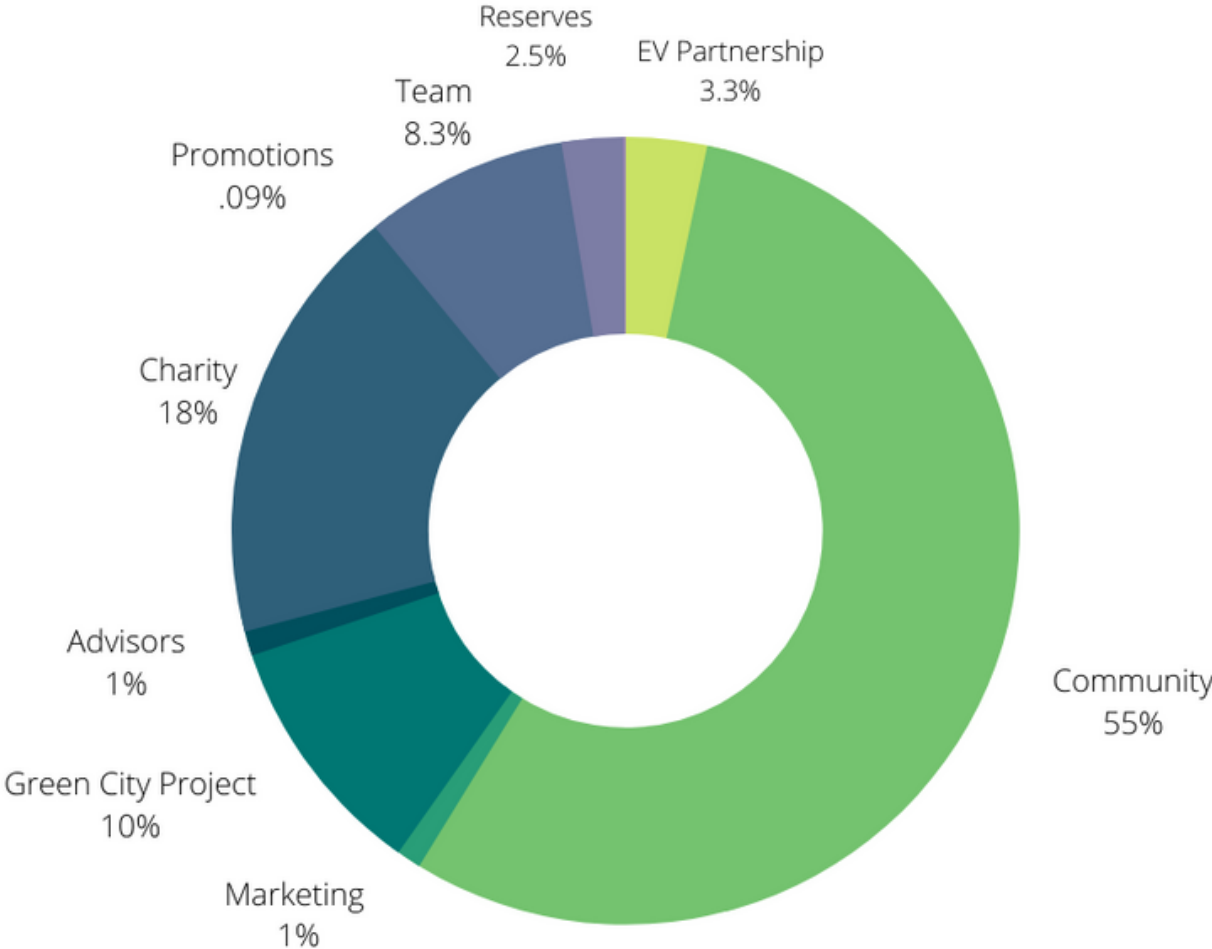

"We believe in a sustainable, community based economy where the interests of people are put first."

We enhance investor and community wealth creation by disbursing 50% of the profits from PPE sales and from investments back to the liquidity pool.

Our project shall be 100% community based. We are not seeking corporate governance over our project. We have chosen to be a US (Florida) based corporation. This means we are complicit with some of the strictest laws and regulations as it pertains to governance, taxes, income reporting etc.

Our token holders will be believers in our project.

TOKENOMICS

Total tokens in Circulation = 1 trillion

- Community:** 55% (550 billion)
- EV Partnership Investment:** 3.3% (33 billion)
- Green City Mexico Project:** 10% (100 billion)
- Advisors:** 1% (10 billion)
- Marketing:** 1% (10 billion)
- Promotions:** 0.9% (9 billion)
- Charitable Causes:** 18% (180 billion)
- Team & Self-Purchases:** 8.3% (83 billion)
- Reserves:** 2.5% (25 billion)

- Profit Distribution**
- Community - 50%
 - Charity - 18%
 - Marketing - 2%
 - Reinvestment & Procurement - 25%
 - Team - 5%

"We believe in a sustainable, community based economy where the interests of people are put first."

ROAD MAP

Ongoing Sustainable Growth for the Community!

ECOSYSTEM

Revenue Generation

- Ace Holdings Global Inc. acquires PPE contracts and sells the PPE products.
- Establish USA state-based PPE and FMCG distribution network.
- 50% of the profits is added to the community pool of ACETokens.
- Revenue generating ventures shall expand to include healthcare, travel, ecommerce, eLearning, and government increasing GDP projects.
- Virtual goods on the blockchain for fortune 500 companies – a decentralized platform to manage, trade, and distribute virtual goods. Give gamers and content creators a new model of ownership.
- ACETokens is the first of its kind to engage with governments and financial institutions with an authentic purpose.

Buyback Guarantee

- Ace Holdings Global Inc. intend to offer buyback options to holders at market value less 5%

Retail Strategy Enhancing Utility

- ACETokens to be used as tokenized payments for consumers of the green energy projects.
- Strategic relationships with key mass consumer touch entities.
- Through partnerships, consumers will be able to earn ACETokens based on predetermined criteria aligned with that of the particular retailer(s).
- Actively pursuing a partnership with one of the largest online banking entities to offer consumers the option to convert their direct deposits or part thereof to ACETokens and receive a 10% bonus.

Community Strategy

- Ace Holdings Global Inc. will promote art and sport from minority and economically challenged countries (children and emerging artists and athletes)
- Ace Holdings Global Inc. plan to provide 18% of profits to food and housing charities.
- Ace Holdings Global Inc. plan to provide foreign governments and corporate entities access to finance to secure FMCG and PPE for their people.

PROJECTS

Real projects. **Real** people. **Real** value.

The absolute core of our project is 100% community focus and true promotion of socio-economic opportunity for all.

- Strategic relationship and equity in identified EV company.
- Strategic relationship and equity in identified wind energy company.
- Equity in identified green City projects.
- 11 million dollars (USD) in PPE procurement contracts per month. Total \$132M in annual sales expected. Estimated profits to be returned to the community circa 5% of sales.
- 50 State distribution network for PPE & FMCG.
- USA - A reward program with an online bank - We offer a token bonus for direct deposit.

PARTNERS

Real projects.
Real people.
Real value.

THE COMMUNITY

"Starting with nothing means that everyone has something to bring to the table."

The community being forged from the buyers and sellers of PPE pre, during, and post the covid-19 pandemic. While the term DeFi includes the term decentralization, this is in reference to the economic status as opposed to internal hierarchy. Our founder, Anthony Bachan, said "we are the pioneers in creating this supply chain management concept that allows a true free trade agreement regardless of government antagonistic or congruent relationships."

Currently under the rule of commodification of time, community run projects are more than just a change of pace, but a way to practice and implement the radical acceptance of others. Success is accomplished and achieved on the strength of the individuals who make up a collective, we are forced to shift our perspectives to align with those around us.

The Ace Holdings Global Inc. ecosystem is in part, our way of recognizing the importance of tearing down this long-established paradigm and bring together like-minded communities to forge a new methodology in procuring PPE during and post covid-19. Face It; another one will come!

Projects built on the foundation of community involvement are the untamed wilderness of our future. As we move further away from rigid financial structures and traditional mindsets, we become free to discover new ways to solve problems and relate to each other.

We must work in harmony outside of the centralized and geopolitical existence. With that thought in mind, we began developing the Ace Holdings Global Inc. ecosystem in earnest. We were not founded from an existing community, let alone a preassembled team. The brilliant minds behind Ace Holdings Global Inc. had never collaborated before. We are a team of innovators, marketers, alternative thinkers, designers, and developers with a single mission and vision; that is, taking care of people by people. We started from zero, with zero. The spirit of our project is to create something out of nothing.

As our Founder says, "We are the pioneers in this space, there will be friction, but we shall overcome." Starting with nothing means that everyone has something to bring to the table.

THE POTENTIAL

The ACETokens derive market value from the potential to be exchanged for other currencies, to be used for payments, and to be used to store value.

Unlike the value of fiat currencies, which is anchored by monetary policies and their status as legal tender, the value of the ACETokens rests on the expectation that others will also value and use them, coupled with the profit share and dividend distributions back to the liquidity pool.

Increased usage and the limitation of supply reduces the deflation risk and helps maintain a stable but increasing value.

As a medium of exchange, ACETokens has significant advantages; offering anonymity of cash while allowing transactions at long distances, and the unit of transaction can potentially be more divisible.

ACEToken properties are especially attractive for micro payments in the new sharing and service-based economy.

Unlike bank transfers, ACETokens transactions can be cleared and settled without an intermediary; especially important in cross-border payments, which are costly, cumbersome, and opaque.

A central bank digital currency could help counter the monopoly power that strong network externalities can confer on private payment networks. It could help reduce costs for individuals and small businesses that have little or costly access to banking services and enable long distance and cross border transactions.

Unlike fiat, a digital currency would not be limited in its number of denominations. From a monetary perspective, interest-carrying bank digital currency would help transmit the policy interest to the rest of the economy when demand for reserves diminishes.

The use of the digital currency would help central banks continue to earn income from currency issuance allowing them to continue to finance their operations and distribute profits to governments.
